

Computer Science 11 Calendar

Autumn to the October break · OCR J277

We meet **five periods a fortnight** — in **Week A** a Wednesday double (P1 and P2); in **Week B** a Wednesday double (P5 and P6) and Thursday P4. There is a short **written code question on Thursday 17 September** which I mark and give back, and your **assessed code question is Thursday 1 October**. Our last lesson before the break is **Wednesday 7 October** — we do not meet on the Friday.

(F) = **formative** — you write it, I give it back with comments, it is not graded. **(S)** = **summative** — this one counts.

What happens in each lesson

Lesson	Time	What we do	Homework due
Wed 9 Sep	P1+P2 · 105	Your hand-written code, read together · the three kinds of error: syntax, runtime, logic · the three constructs — sequence, selection, iteration · then data types and casting	Programming 1 due
Wed 16 Sep	P5+P6 · 105	Operators — MOD, DIV and ^ · the Boolean operators AND, OR, NOT · then a data types drill before Thursday	Programming 2 and Programming 3 due
Thu 17 Sep	P4 · 50 min	(F) Written code question · on paper, 25 min · you get it back with comments, not a grade	
Wed 23 Sep	P1+P2 · 105	Arrays — storing many values under one name · one-dimensional, then two-dimensional · reading a value out by its index	
Wed 30 Sep	P5+P6 · 105	Sub programs — functions and procedures · what each one gives back · local and global variables · everything working together in one program	
Thu 1 Oct	P4 · 50 min	(S) Paper 2 style code question · written on paper, no IDE · this one counts	
Wed 7 Oct	P1+P2 · 105	Your assessed question back, worked through · what comes after the break · holiday work	

*We write code at 101computing.net/online-python-ide — no account, no installing. It only remembers your work in this browser, on this device, so **copy your code into your Drive before you close the tab**. Paper 2 is half your GCSE and it is written on paper — which is why we practise by hand.*
