

Name: _____

Date: _____

Mr. Rawson • Y8 MYP Physics

Physics 8B Calendar

Light & the EM Spectrum • to the October break

We meet **seven times** before the October break — **once** in a Week A (Friday) and **twice** in a Week B (Monday and Friday), so check the letter on the left of each row. We finish your **reflection write-up on Friday 11 September** and it is **due on Monday 14 September** as a formative. The **refraction investigation is the summative**: we prepare it on 25 September, carry it out on 28 September and 2 October, and it is **due on Friday 9 October**, our last lesson. **There is no test this half-term** — the end-of-unit test is after the October break.

(F) = **formative** — you hand it in, I give it back with comments, it does not go on your report. **(S)** = **summative** — this one counts.

Week	Mon	Tue	Wed	Thu	Fri
7 Sep A	7	8	9	10	11 L3
14 Sep B	14 L4 (F)	15	16	17	18 L5
21 Sep A	21	22	23	24	25 L6
28 Sep B	28 L7 (S)	29	30	1 Oct	2 L8 (S)
5 Oct A	5	6	7	8	9 L9

What happens in each lesson

Lesson	Date	Time	What we do
L3	Fri 11 Sep	09:55	Finish the reflection packet · remaining trials · conclusions · due Monday
L4 (F)	Mon 14 Sep	12:15	Reflection packet due — handed in today. Then refraction · change of speed at a boundary · which way light bends
L5	Fri 18 Sep	09:55	Measuring refraction · light through a glass block · the normal again · what changes and what does not
L6	Fri 25 Sep	09:55	Preparing the investigation · asking a question · hypothesis · variables · planning a method
L7 (S)	Mon 28 Sep	12:15	Refraction investigation · your question · hypothesis · variables · method
L8 (S)	Fri 2 Oct	09:55	Refraction investigation · results · analysis · conclusion · evaluation
L9	Fri 9 Oct	09:55	Investigation due — handed in today. Then shadows and eclipses · umbra and penumbra · why not every month
