

Physics 12 SH Calendar

Autumn to the October break · C.1 Simple Harmonic Motion

We meet in **Week A only** — a Monday double, P3 and P4, and a Tuesday single, P1. Nothing at all in a Week B. That gives **three blocks** before the October break, and the **topic test is Tuesday 6 October**.

Week	Mon	Tue	Wed	Thu	Fri
7 Sep · A	7 LAB	8 P1	9	10	11
14 Sep · B	14	15	16	17	18
21 Sep · A	21 LAB	22 P1	23	24	25
28 Sep · B	28	29	30	1 Oct	2
5 Oct · A	5 P3+P4	6 TEST	7	8	9 <i>last day of term</i>

What happens in each lesson

Lesson	Time	What we do	Due this lesson
Mon 7 Sep	P3+P4 · 105	LAB SHM practical. What counts as an oscillation · period of a mass on a spring · uncertainty in mass and timing	—
Tue 8 Sep	P1 · 55 min	Spreadsheets and graphing · T^2 against m · gradient to the spring constant · $a = -\omega^2 x$ · the pendulum	—
Mon 21 Sep	P3+P4 · 105	LAB Pendulum lab. Measuring g as a class · T^2 against l · a cart-on-ramp SHM demo	1 Kerboodle reading · 2 problem set Q1–9 (Q10–13 HL) · 3 practical write-up
Tue 22 Sep	P1 · 55 min	Analysing our SHM data · linearising to k · position, velocity and acceleration	—
Mon 5 Oct	P3+P4 · 105	Revision, the whole of C.1 · SHM 3 homework gone through	SHM 3 homework
Tue 6 Oct	P1 · 55 min	TEST C.1 topic test · last lesson before the break	revision

The gaps are the thing to plan around

There are **13 days between one block and the next**, so anything set is due at the **start of the following block** — start it while it is fresh, not the night before. After **Tue 6 October** we do not meet until **Mon 2 November**: term resumes on the 26th, but that week is a Week B. **27 days** — so the test is our last lesson before the break, the day after a full revision double.
