Design 9B Calendar

Designing Digital Greeting Cards • Criterion A — Inquiring and analysing

You are going to design and build a digital greeting card for one real person, and actually send it to them. We meet **six times** before the October break — always in pairs, a Wednesday and a Friday, with a fortnight between each pair. Your written work is assessed on **Wednesday 7 October** against **Criterion A — Inquiring and analysing**; the rubric is on the back of this sheet.

(F) = **formative** — you write, I give it back with comments, not graded. **(S)** = **summative** — this one counts.

Week	Mon	Tue	Wed	Thu	Fri
7 Sep	7	8	9 Lesson 2	10	11 Lesson 3
14 Sep	14	15	16	17	18
21 Sep	21	22	23 Lesson 4 (F)	24	25 Lesson 5
28 Sep	28	29	30	1 Oct	2
5 Oct	5	6	7 Lesson 6 (S)	8	9 Lesson 7 <i>last day of term</i>

What happens in each lesson

Lesson	Date	Lesson plan	Homework due
Lesson 2	Wed 9 Sep	Plotting shapes. How the Game Lab grid works — 400×400, and the anchor-point rule. Then the paired drawing activity.	2
Lesson 3	Fri 11 Sep	Shapes and parameters — width, height and background().	3
Lesson 4 (F)	Wed 23 Sep	The card shop. Hundreds of cards, each designed for one kind of person. You analyse one in writing, and I give it back with comments.	4 5 6
Lesson 5	Fri 25 Sep	Your writing comes back. Who your card is for. Then analyse three real cards and write your design brief . Bring three cards.	7 8 9 10
Lesson 6 (S)	Wed 7 Oct	SUMMATIVE — written in class. Criterion A, all four strands. The rubric is on the back of this sheet.	—
Lesson 7	Fri 9 Oct	Build your card in Game Lab, and send it. Last day of term.	—

Criterion A — Inquiring and analysing

What your summative on Wednesday 7 October is marked against

Criterion A is marked **out of 8**, in four strands. Your summative asks you to do all four. Read *down* a column to see how one strand gets better; read *across* a row to see what a level looks like. The bottom row says what each strand means **on this project**.

Level	i · the need	ii · research plan	iii · analysing	iv · design brief
0	The student does not reach a standard described by any of the descriptors below.			
1–2	states the need for a solution to a problem	states some of the main findings of relevant research	—	—
3–4	outlines the need for a solution to a problem	states the research needed to develop a solution to the problem, with some guidance	outlines one existing product that inspires a solution	develops a basic design brief, which outlines some of relevant research
5–6	explains the need for a solution to a problem	constructs a research plan , which states and prioritizes the primary and secondary research needed, with some guidance	describes a group of similar products that inspire a solution	develops a design brief, which outlines the findings of relevant research
7–8	explains and justifies the need for a solution to a problem	constructs a research plan, which states and prioritizes the primary and secondary research needed, independently	analyses a group of similar products that inspire a solution	develops a design brief, which presents the analysis of relevant research
On our project	Who is your card for, and why does one you built beat one from a shop?	Look at real cards, and ask the person it is for what they want. What matters most?	Analyse three real cards. Strengths <i>and</i> weaknesses.	Who it is for, what style, what your card is — built from your research.

The words that move you up — the strands barely change between levels, the *verb* does:

states you wrote it down

outlines you gave the short version

describes you said what it is really like

explains you said *why*

analyses you broke it apart

justifies you argued for it
