Answer key — card sort

Nineteen uses, sorted into the seven regions. Order within a region does not matter.

❶ Gamma Rays	Treating cancer Killing germs on hospital tools Looking at distant galaxies Checking for radiation leaks
❷ X-Rays	Seeing a broken bone Airport bag scanners
❸ Ultraviolet (UV)	Getting sunburnt Solar panels on a roof
❹ Visible Light	Taking a photograph Internet through glass cables
❺ Infrared	A TV remote control Heat cameras at night
❻ Microwaves	Heating food in a microwave WiFi and Bluetooth Sat nav finding your car Radar tracking aircraft
❼ Radio Waves	Listening to the radio Emergency services radios Talking to a submarine

Crossword

1 Across (15,8) — *The manipulation of this hidden phenomena is the single most important discovery in human history.*

ELECTROMAGNETIC SPECTRUM

Two defensible arguments to expect. *Solar panels on a roof* sits under ultraviolet here, but panels absorb across visible and infrared too, so a pair arguing for visible light is not wrong. *Internet through glass cables* sits under visible light; real fibre runs on infrared. Both are worth hearing out rather than correcting flat.
