

Name: _____

Class: _____

Mr. Rawson • GCSE Computer Science

Year 11 2026

Programming Challenge: Selection

Age Group Checker (HARD)

https://isaaccomputerscience.org/questions/selection_hard

- Write a Python program that asks the user for their age and prints whether they are a Child (under 12), a Teenager (12 to 17), an Adult (18 to 64), or a Pensioner (65 or older).

Example Output:

```
> Enter your age: 70  
  
Pensioner
```
