Kinematics Graphing Overview

An object starts from rest and accelerates at 2.0 m/s^2 for 4.0 s .

Mr. Rawson • GCSE Physics

The gradient of the p-t graph at 3 s
gives the **velocity** at 3 s.

gradient

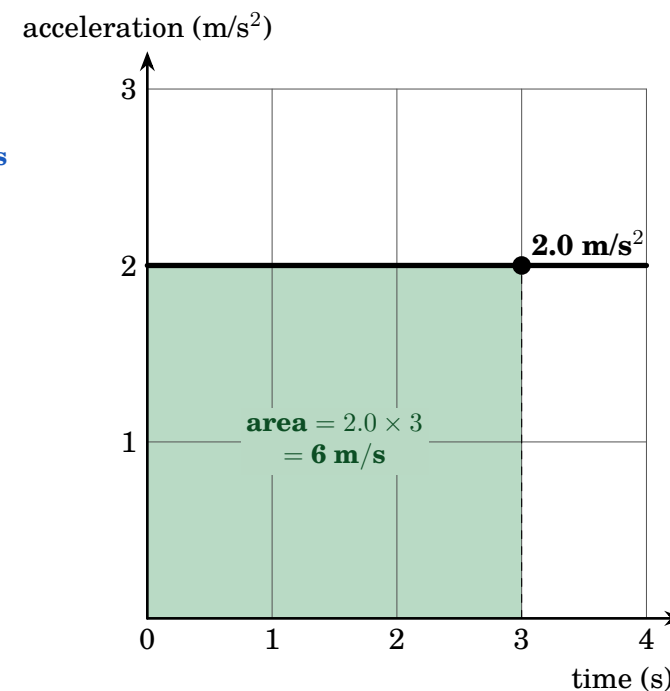

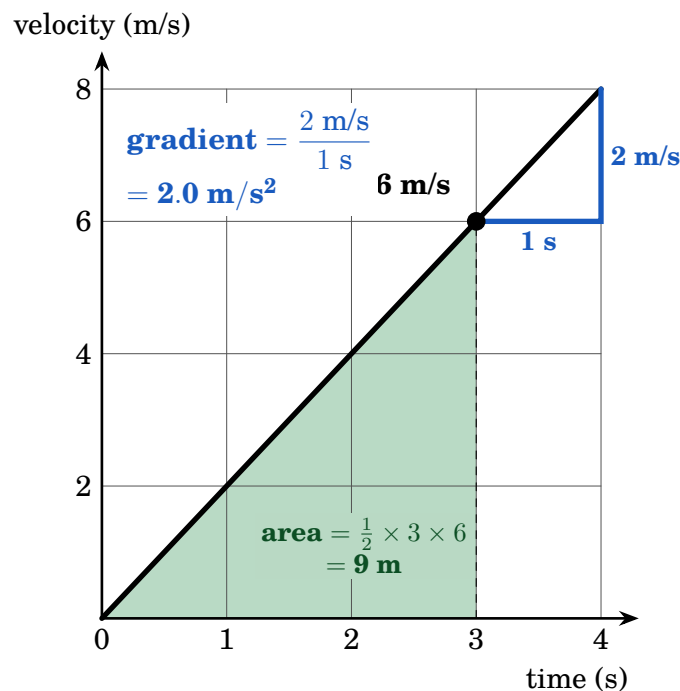

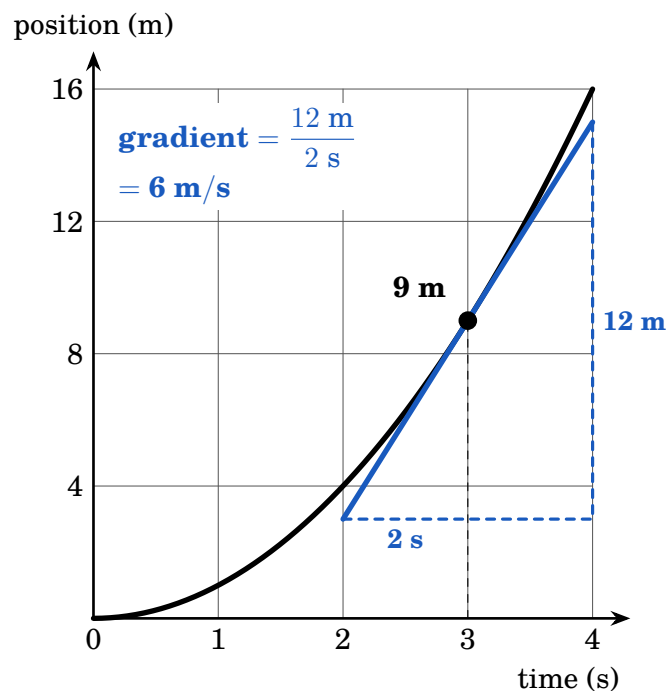

The gradient of the v-t graph at 3 s
gives the **acceleration** at 3 s.

gradient

position-time

velocity-time

acceleration-time

area under

The area under the v-t graph up to 3 s
gives the **displacement** at 3 s.

area under

The area under the a-t graph up to 3 s
gives the **velocity** at 3 s.
