Lesson 9

Sprite Properties

Warm Up

Journal Prompt:

- What is your definition of a sprite?
- What sprite properties do you know how to use?
- What other sprite properties might be useful?

Question of the Day

How can we use sprite properties to change their appearance on the screen?

Activity

Code Studio, Level 1

Do This

- Look at the code below and predict where the bee sprite will appear.
 - A. a bee sprite in the middle of the screen
 - B. a bee sprite in the bottom right corner
 - C. two bees, one in the middle and one in the bottom right corner
 - D. three bee sprites, all in different places
 - E. nothing, there will be an error

Video

Key Vocabulary

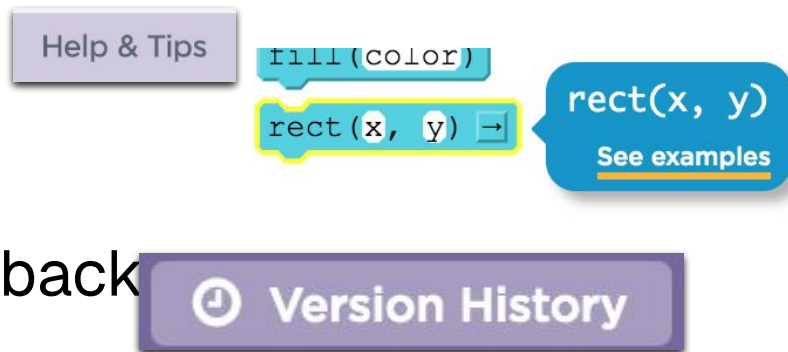

- **Property:** A label for a characteristic of a sprite, such as its location and appearance
- **Dot notation:** the way that sprites' properties are used in Game Lab, by connecting the sprite and property with a dot.

Code Studio, Level 2-3

Skill Building

Do This

- Follow the instructions on each level
- If you get stuck, try...
 - Help and Tips Tab
 - Code Documentation
- If you make a big mistake...
 - Use version history to go back

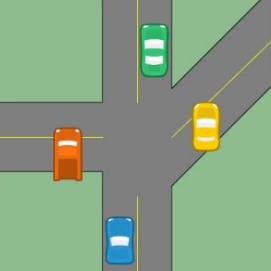

Code Studio, Level 4

Practice Level

Do This

- Practice your new skills on these levels
- Check with your teacher before moving on

 a Scale Property Use the scale property to make the animals the right size.	 b Rotation Property Rotate the cars so they fit in the traffic lanes.	 c Multiple Properties Rotate and scale the sprites so they look like they are floating in space.
--	---	--

Code Studio, Level 5

Assessment Level

Do This

- Follow the instructions in Code Studio
- The "Rubric" tab describes how to demonstrate your understanding
- Check out the Help & Tips tab if you need help

Code Studio, Level 6

Challenge Level

Do This

- Challenge yourself on these levels.
- Learn new blocks or use the same ones in new ways.

a New Block : Tint

Adjust the sprite's color with tint.

b New Blocks : Height & Width

Stretch your sprite horizontally or vertically.

c New Block : Alpha

Adjust the sprite's transparency with alpha.

Wrap Up

Journal Prompt:

What is one way sprite properties are the same as variables?

What's one way that sprite properties are different from variables?

Question of the Day

How can we use sprite properties to change their appearance on the screen?
