

Name: _____

Class: _____

Mr. Rawson • GCSE Computer Science

Year 11 2026

Y11 CS J277 Audit

Not a test, not marked, and it will not be shown to anyone else. I have your old class's records, but records only tell me what was *taught* — they cannot tell me what stuck. Only you can. Guessing high costs you lessons you actually needed, so be honest where you are unsure.

Left half — what you used. Tick every resource you actually used for that topic, even once. Leave it blank if you never touched it. **Right half — how strong is it now?** One tick per row.

	BBC Bitesize	Seneca	Paul Long book	CGP guide/cards	OneNote notes	Drive question packs	Quizlet / Blooket	Revision videos	Solid now	Rusty	Patchy	Nothing
Paper 1 — Computer systems												
Topic 1 — Systems architecture, memory and storage	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Topic 2 — Data representation	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Topic 3a — Networks and protocols	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Topic 3b — Network security	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Topic 4 — Systems software	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Topic 5 — Ethics and society	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Paper 2 — Computational thinking, algorithms and programming												
Topic 6 — Algorithms	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Topic 7 — Programming	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Topic 8 — Robust systems	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Topic 9 — Boolean logic	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐
Topic 10 — Programming languages and the IDE	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐

Which one topic on this page worries you most? _____

Name: _____

Class: _____

Mr. Rawson • GCSE Computer Science

Year 11 2026

Part 2 — Programming, honestly

Thirty of the eighty marks on Paper 2 come from writing actual code, so this page matters more than any other. Tick **Yes** only if you have genuinely done the thing yourself — not watched it, not copied it off a board. **No** is a completely fine answer and tells me something useful.

	Yes	No
Have you ever, yourself...		
typed a program into a computer and run it?	☐	☐
written a program that asks the user a question and prints an answer?	☐	☐
stored something in a variable and used it later?	☐	☐
used <code>int()</code> or <code>str()</code> to change what type something is?	☐	☐
written an <code>if</code> statement that does one thing or another?	☐	☐
written a loop that repeats something?	☐	☐
used a list (an array) to hold more than one value?	☐	☐
written a program in more than about ten lines?	☐	☐
had a program fail, found out why, and fixed it yourself?	☐	☐
read or written a file from a program?	☐	☐
Have you used...		
the Raspberry Pi online editor (<code>editor.raspberrypi.org</code>)?	☐	☐
Thonny, IDLE, VS Code or PyCharm on a computer?	☐	☐
Flowgorithm, or any flowchart-based programming?	☐	☐
time2code or missionencodeable?	☐	☐
a logic gate simulator such as <code>logic.ly</code> ?	☐	☐
And...		
have you ever sat a full mock exam paper for this course?	☐	☐
did the Y10 mock include programming questions you had to write code for?	☐	☐

Is there anything you did in Year 10 that is not anywhere on either page?

Anything you want me to know before we start? Anything at all.
