

Name: _____

Date: _____

Mr. Rawson • Y9 MYP Physics

Physics 9B Calendar

Oscillations & Waves • to the October break

We meet **three times a fortnight** — **once** in a Week A (Thursday P4) and **twice** in a Week B (Tuesday P2 and Friday P3), so check the letter on the left of each row. **Six lessons left before the break.** Our Friday lesson is a **Week B** one, and **Friday 9 October is a Week A Friday** — so **we do not have Physics on the last day of term and our last lesson is Thursday 8 October.** The **pendulum investigation is the summative**: we plan it on 18 September, carry it out on 24 September and write it up on 29 September, when it is **handed in.** **There is no test this half-term** — the end-of-unit test is after the October break.

(S) = summative — this one counts. It is marked against **Criterion B** (inquiring and designing) and **Criterion C** (processing and evaluating), the two we looked at on 10 September.

Week	Mon	Tue	Wed	Thu	Fri
7 Sep A	7	8	9	10 L2	11
14 Sep B	14	15 L3	16	17	18 L4
21 Sep A	21	22	23	24 L5 (S)	25
28 Sep B	28	29 L6 (S)	30	1 Oct	2 L7
5 Oct A	5	6	7	8 L8	9 last day <i>no Physics</i>

What happens in each lesson

Lesson	Date	Time	What we do
L3	Tue 15 Sep	09:55	The period of a pendulum · timing 20 swings · repeats and averages · does length change the period?
L4	Fri 18 Sep	11:15	Planning your investigation · question · hypothesis · variables · method · against Criteria B and C
L5 (S)	Thu 24 Sep	12:15	Pendulum investigation · your question · hypothesis · variables · method · collecting your data
L6 (S)	Tue 29 Sep	09:55	Pendulum investigation · table · graph and line of best fit · conclusion · evaluation · handed in today
L7	Fri 2 Oct	11:15	Oscillations and frequency · hertz · kHz and MHz · period and the $f = 1/T$ relationship
L8	Thu 8 Oct	12:15	Transverse and longitudinal waves · peak, trough, wavelength, amplitude · compression and rarefaction · reading a wave diagram
