

The Byte Strip · card sheet

One sheet per pair. Cut down the white gaps — never along a printed edge. **Keep the backs blank.**

✂ **THE PLACE-VALUE CARDS** — eight of them, for the byte mat on page 1. Seven cuts down.

128	64	32	16	8	4	2	1
-----	----	----	----	---	---	---	---

✂ **THE SIXTEEN-CARDS** — sixteen dots on each, for Move 5. Three cuts down, three across.

Eight place-value cards make any byte. Sixteen sixteen-cards is $16 \times 16 = 256$ dots — one more than a single byte can hold.
